

AHPRN

Allied Health Professions
Research Network

Supporting research development and its integration into practice

Launching the
South East England

Allied Health Professions' Research Network

Tuesday 6th December 2011

What *is* research?

How do I start?

How can I get the skills I
need to do research?

*How can I turn an idea into a
research question?*

Where can I exchange research ideas
with other local practitioners?

Can I be involved in research
and continue practising?

Why do AHPs NEED to research?

If you've been wondering how research can be integrated into your work, join us at our South East England hub AHPRN launch event
