

XII SoNG meeting

25th September 2014
Avenue Campus University of Southampton

The Human Brain

Confirmed invited speakers:

Prof. Suzana Herculano-Houzel (Universidade Federal do Rio de Janeiro, Brazil)
The costs and advantages of the remarkable, but not extraordinary, human brain.

Prof. Seth Grant (University of Edinburgh)
Synapse complexity: evolution, cognition and disease.

Matthijs B. Verhoog (VU University, The Netherlands)
Synaptic plasticity at human neocortical synapses

Prof. James Nicoll, Dr. Delphine Boche, Research Governance Office UoS
Workshop: How to use human brain samples for your research

Our program will be supplemented with **selected short talks from early-career researchers** from SoNG and associated grouping, which will be selected from the abstract submissions.

In keeping with the spirit of the SoNG the theme will be used to provide the meeting focus but we encourage contribution from SoNGs wider cohort.

Deadline for submission of abstracts is 30th July

We encourage the submission of abstracts, indicating if you want to be considered for an oral or poster presentation, by sending an email to Debbie Buck (d.buck@soton.ac.uk)
