

Protecting and improving the nation's health

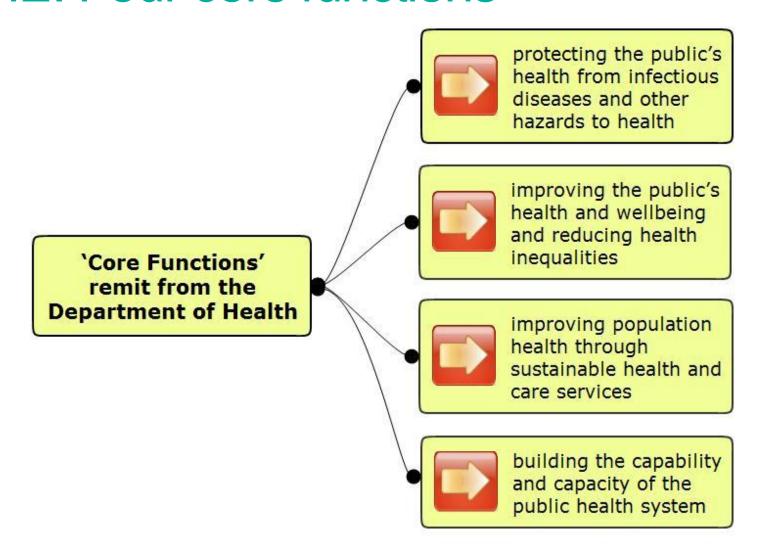

Public Health England (PHE): an overview and the role of the South East Centre

Sue Dewhirst, Public Health Manager, Health & Wellbeing, Public Health England, South East Centre February 2016

Public Health England

PHE exists to protect and improve the nation's health and wellbeing, and reduce health inequalities.

PHE: Four core functions

PHE - seven key priority areas

Tackling obesity

Reducing smoking

Reducing harmful drinking

Ensuring every child has the best start in life

Reducing dementia risk

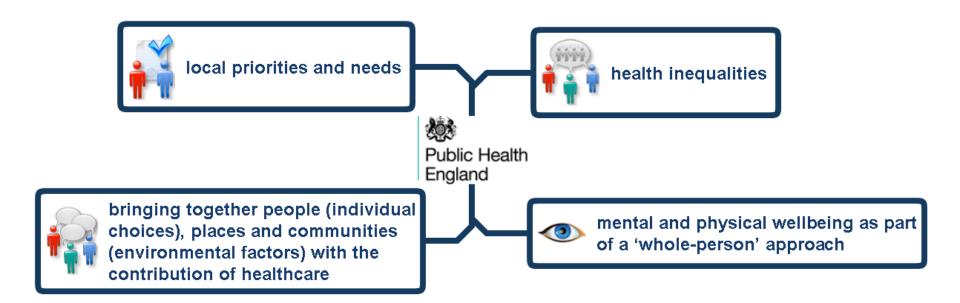

Tackling antimicrobial resistance

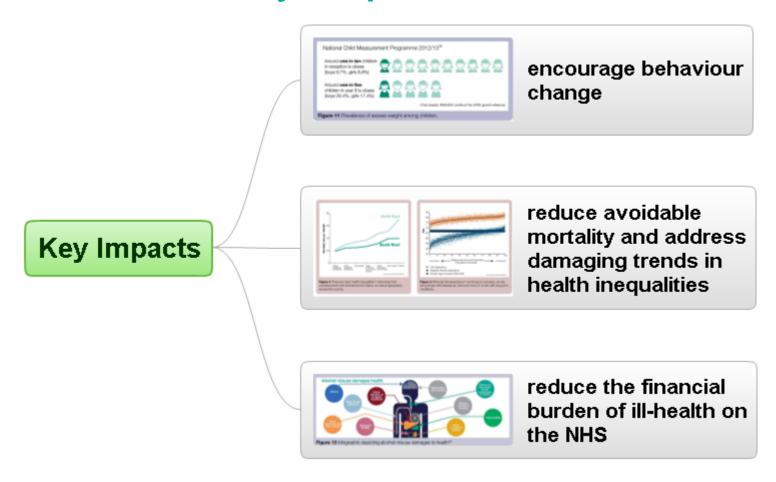

Reducing tuberculosis

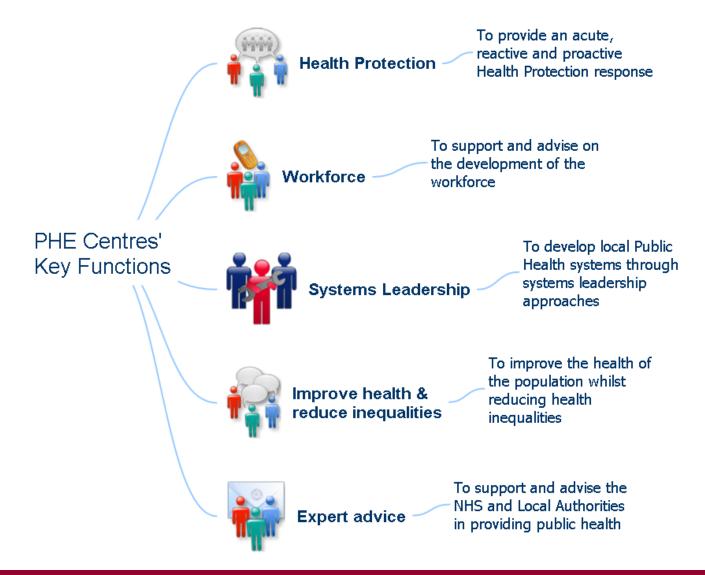

PHE: Four underpinning themes

PHE: three key impacts

What PHE Centres do

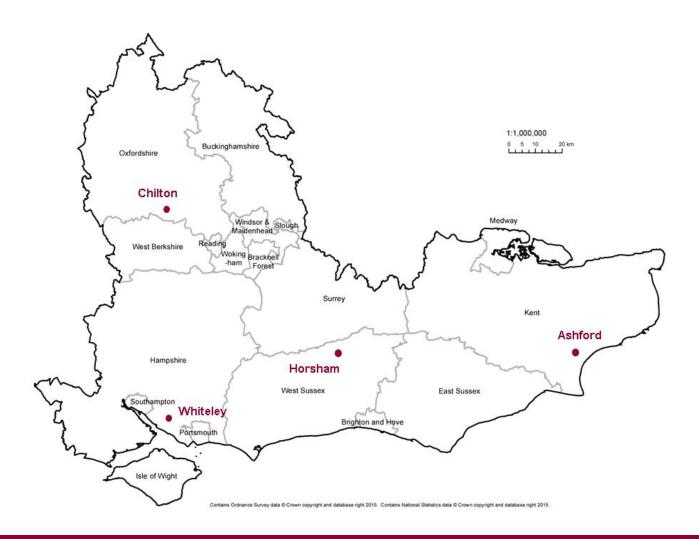

Our work promotes wellbeing and creates environments that enable individuals, families and communities to be informed, empowered, healthier and more productive.

South East Centre

Protecting and improving the nation's health

Public Health England South East

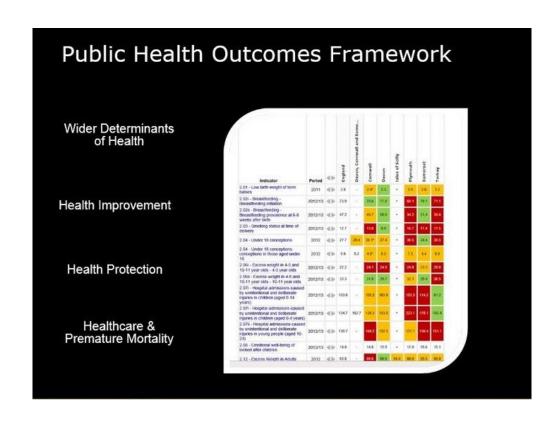

Public Health England South East

- A population of 8,614,573
- Local authorities: 7 county, 11 unitary and 63 district/borough
- 18 health and wellbeing boards
- 38 Clinical commissioning groups
- 5 local resilience forums
- 3 local education and training boards
- 3 academic health science networks
- Public health teams in universities

The 'Public Health Outcomes Framework'

PHE Centres work with intelligence colleagues to use the PHOF and other data sets to inform their knowledge, intelligence and understanding of the local public health system

PHE centre health and wellbeing teams

- Public Health England is a key part of the local public health system
- The PHE centre is the 'front door' to PHE for local stakeholders
- Each PHE centre health and wellbeing team workforce is unique
- Teams include professional public health staff up to consultants
- Work plans reflect the needs of the local system and national drivers
- PHE Centre health and wellbeing teams work to the same principles

Protecting and improving the nation's health
