Introduction

Welcome to the module STAT6089 Evaluation and Monitoring for 2017-2018! This document includes important Pre-Module Information. It is not the Module Outline, which will be distributed closer to the start date, but I hope it will provide you with an idea of what the module is about, and give you access to some preliminary reading. It also includes a provisional timetable. The timetable is provisional in the sense that we might amend the amount of time allocated to specific topics. **We shall not, however, change the start and end times of each day’s teaching. These are not provisional: they are (metaphorically) cast in stone.**

I am looking forward to a jolly time studying Evaluation and Monitoring.

Objective of the module

By the end of this module, you should understand of the nature and aims of monitoring and evaluation, and of the contribution of statistical methods, using examples from government and other areas.

Things you will learn

On successful completion of this module, you should understand the broad principles guiding the choice between alternative methods of evaluation and monitoring and be able to apply these principles by designing a broad strategy for the monitoring and evaluation of a specific government programme or policy.

In particular, you should gain knowledge of:

- alternative experimental, quasi-experimental, and regression designs for evaluating programmes;
- statistical methods used in the analysis of data from such designs to estimate programme effects while allowing for potential confounding factors.
Skills to be developed

You will develop skills in data analysis, in understanding the difference between experimental and observational studies, and in designing research projects to maximise the chance of being able to establish cause and effect.

Staff

The module is taught by Dr Andrew Hinde of the Department of Social Statistics and Demography.

Dr Hinde lives in the historic market town of Alton, at some distance from the University, but he may be found from time to time in Room 4031 on Level 4 of the Murray Building (Building 58).

Dr Hinde’s Office Hours during Semester 1 of the 2017-2018 academic year are

- Mondays from 11.30 a.m. – 12.30 p.m. (except 30 October and 27 November 2017)
- Wednesdays from 10.30 – 11.30 a.m. (except 18 October, 1. 8 and 29 November 2017 and 17 January 2018)

These Office Hours are more than notional. Dr Hinde really will be in his office at these hours to answer your questions about the module. This means that if you want to see him urgently THESE ARE THE HOURS TO CALL IN. If you call at other hours he may not be there.

To see Dr Hinde at other times, it is best to make an appointment. This can be done by e-mail (Andrew.Hinde@soton.ac.uk). His telephone number is 023 80 599631.

The Administrator for the MSc in Official Statistics is Claire Woodley, who can be found in the Social Statistics and Demography Student Office on Level 2 of Building 58 (SocStatDemo.StudentOffice@soton.ac.uk).

Pre-requisites

The pre-requisite is STAT6095 Regression Modelling or an equivalent introduction to statistical modelling. Hence you should be familiar with basic statistical inference (confidence intervals and hypothesis testing), linear and logistic regression.

No prior knowledge of evaluation and monitoring will be assumed, but it may be helpful for you to do a bit of preparatory reading. Three good references are listed in next section.

You will need to be familiar with Excel and Statistical Package for the Social Sciences (SPSS). Other computer packages will not be needed for this module.
Recommended reading before embarking on the module

These readings are available on the module’s Blackboard site (see below), in the content area called *Reading materials*.

A detailed bibliography will be included in the Module Outline.

**Blackboard**

You should automatically be enrolled on the module’s Blackboard site. If you do not have access to the site, please let me or Claire Woodley know so that we can enrol you.

The Blackboard site is available now, and materials will be added to it between now and the start of the module on 30 October 2017. They will also be added during the module and afterwards.

You can log in to the Blackboard site at [http://blackboard.soton.ac.uk/](http://blackboard.soton.ac.uk/). The site will contain all the relevant course materials. Lecture slides will be posted on the site a few days before the module starts. Instructions and data sets for the practical exercises will be there. Reading materials and the Coursework Assignment will also be posted there. NEARLY EVERYTHING IS ON BLACKBOARD. Announcements about the logistics for the module will also be posted there. You should check regularly to ensure that you do not miss anything.

You will also need to submit your Coursework Assignment through Turnitin on Blackboard.

**Assessment**

Assessment is 100% by a single Coursework Assignment. The deadline for submission of the coursework is Tuesday 19 December 2017.

Andrew Hinde
13 October 2017
Provisional Programme

Summary

To assist with preparation, finding child care, etc., the start and end times of each day’s sessions are as follows:

Monday 30 October 2017  10.00 a.m. – 5.30 p.m.
Tuesday 31 October 2017  9.30 a.m. – 5.30 p.m.
Wednesday 1 November 2017  9.30 a.m. – 5.30 p.m.
Thursday 2 November 2017  9.00 a.m.* – 5.00 p.m.
Friday 3 November 2017  10.00 a.m. – 11.00 a.m.**

* If you cannot make it by 9.00 a.m. it will not be critical, as we start with a computer workshop. But Dr Hinde aims to be present from 9.00 a.m.
** Optional session (but highly recommended)

Monday 30 October 2017

10.00 – 10.15  Registration and coffee
10.15 – 10.30  Introduction to the module
10.30 – 11.30  1. Evaluation and monitoring – types, aims and examples
11.30 – 11.45  Coffee/Tea
11.45 – 12.30  1. Evaluation and monitoring (exercises)
12.30 – 13.00  2. Data Sources and research methods
13.00 – 14.00  Lunch
14.00 – 15.00  2. Data Sources and research methods (continued)
15.00 – 15.45  3. Some examples from performance monitoring
15.45 – 16.00  Coffee/Tea
16.00 – 17.30  4. Conceptual framework for the evaluation problem

Hallowe’en (Tuesday 31 October) 2017

9.30 – 11.00  5. Randomised controlled trials
11.00 – 11.30  Coffee/Tea
11.30 – 12.15  5. Randomised controlled trials (exercises)
12.15 – 13.00  6. Quasi-experimental designs
13.00 – 14.00  Lunch
14.00 – 14.45  6. Quasi-experimental designs (continued)
15.30 – 16.00  Coffee/Tea
16.00 – 16.45  7. Matching
16.45 – 17.30  7. Matching (exercises)

All Saints Day (Wednesday 1 November) 2017

9.30 – 11.00  8. Propensity score matching (design and analysis)
11.00 – 11.30  Coffee/Tea
11.30 – 13.00  9. Regression methods for adjustment
13.00 – 14.00  Lunch
14.00 – 15.30  9. Regression methods (exercises)
15.30 – 16.00  Coffee/Tea
16.00 – 17.30  Introduction to case study of United Nations Population Fund and China

Thursday 2 November 2017

9.00 – 11.00  Case study (practical exercise)
11.00 – 11.30  Coffee/Tea
11.30 – 12.15  10. Regression discontinuity design
12.15 – 13.15  10. Regression discontinuity design (exercise)
13.15 – 14.15  Lunch
14.15 – 15.45  11. Instrumental variables
15.45 – 16.15  Coffee/Tea
16.15 – 16.45 Discussion of the Coursework Assignment
16.45 – 17.00 Module evaluation

Friday 3 November 2017
10.00 – 11.00 Tutorial on the Coursework Assignment (optional)
