***Written reports of the Severn-Trent Water Authority
Directorate of Scientific Services Regional Laboratory,
Nottingham, on biological analysis of the River Trent,
Derwent and other rivers, noting:***
 (2/4/1-2/4/33 and 2/4/43-5) ***the station, date, flow, depth of the
river, type of bottom, weed, sample number, river name, map
reference, temperature, condition and field observations,
below which is listed the name group classification, next to
which are columns into which information can be added on
number of species, number of organisms, the species list and
number and at the foot of the paper, Trent Biotic index,
extended Biotic index, D of E class, Biotic score, BMWP score
and diversity index***
 (2/4/34-42 and 2/4/46-51) ***the station and sample numbers,
type of bottom, flow and weed, depth, river, station, map
reference, date and field observations, below which is listed an
exhaustive list of BMWP families found, with boxes to be
ticked, next to which are columns into which information can
be added on number of species and species list, and at the foot
of the paper, Trent Biotic index, extended Biotic index, D of E
class, Biotic score, BMWP score and diversity index***
