Bridge Built In Eight Days

60b

GEN. SULTAN'S H.Q., BURMA — British 36th Division engineer units lay claim to a new construction record after recently completing a 765-foot two-section teakwood bridge across the rapid Shweli River at Myitson in just eight days.

Before the actual bridge-building could begin, the men had to handsaw fell 903 British Admiralty teak trees, valued at \$20,000, and then haul the logs to the river bank. Iron ties and spikes were fashioned by hand from captured Jap material and 11-foot trestles were erected.

One construction gang completed 225 feet of the bridge from the Shweli's south bank to a mid-stream island in four days, while two other gangs finished construction of a 450-foot link from the north bank to the island four days later. The 700 men on the project averaged 100 feet of bridgework per day.

Believed to be the largest one of its kind ever built by a divisional engineer unit under similar circumstances, the bridge was constructed entirely without the use of a single piece of machinery.

Ah, that *British* ingenuity!

Very good and very excellent talk by W. Miles-Jones of the Ministry of Education. Much on the 4th Conference well attended in this in the chair.

Wrote down to Bradbury till about 4:30 and walked up to before dinner. Spent the rest of the time alone.

Broadlawns

Sunday, June 17

3rd Sunday after Trinity

A flowers sunny day and I walked
across the lovely fields with
maggie and sun bathed and
read and wrote and did
just layed. Terns laid and
althea blossoms of a hundred or
more of which I have not
seen before. Saw Noddy at
a time of year and looked over
Broadlawns looking quite
beautiful and might be the
finest I have seen
after the absence of over a
month.
